Yes, I can try the records center first, that would be best. Hopefully it was "freded" correctly and that they can locate it. Peter

Marcella - I can try to get a copy of UAA on CD from Bill Simon but it seems like EPA should have a copy in its files. I am also interested in EPA's comments on the UAA report prior to the final approval letter. If Peter or you can help locate a copy that might be easier than getting a copy from ARSG.

Paula-

It seems the Animas UAA is a truly rare document. I can ask the Records Center, if you'd like. Peter Ismert checked the Animas River Stakeholder's Group website and they apparently have a few copies on CD - see mention at <http://www.http://www.animasriverstakeholdersgroup.org/page6.html>

Hopefully the approval letter and it's rationale will be helpful.

How did 2001 get to be "old"?

Marcella

It appears the files for that particular rulemaking action were sent to the Records Center (and I'm guessing the files probably contained a copy of the UAA). The WQS revisions that were adopted by Colorado (based on the UAA) were approved by EPA with a Feb 27, 2002 letter (attached). Carol Russell may kept some of the stuff, the Records Center might be able to find the files, and the Colorado WQCC might still have a copy of everything. The public hearing was in 2001. The Statement of Basis and Purpose adopted by the WQCC is at Section 34.29 of Regulation 34 (open the link below and search on "34.29."

Dave, Karl, and/or Julie-

My understanding is that the NPS Program paid for parts of the TMDL and UAA development, most likely through the various data-gathering projects and funding the local watershed coordinator. I do have some instances of data in the various "Animas River Targeting (and Continuation) projects in the Grants Reporting and Tracking System, but don't have the UAA itself. I've passed along the link to the TMDLs in case Paula didn't have them already.

Where would we find a UAA?

Thanks!

Marcella

When: Monday, July 14, 2014 2:30 PM-3:30 PM (UTC-07:00) Mountain Time (US & Canada).

Where: tbd

Marcella - Thank you for responding so quickly. One thing I have been trying to track down is the entire UAA - Use Attainability Analysis for the Upper Animas. How would I about getting a copy? I am also interesting is finding a copy of EPA's comments on the UAA.

Thank you.
